

AUTO-DARKENING WELDING HELMET VIMSEA

Key features

> Electronic welding mask whose main objective is to protect the user from possible injuries, having been manufactured with excellent quality material. - It has a harness with regulator and sweatband, increasing its comfort. - Permanent protection against UV/IR and modern design allied to a high comfort of use, this mask consumes little battery, having autonomy of 5000 hours. - Equipped with sensitivity adjustment and response time adjustment.

Specifications

Adjustable harness	Yes
Battery type	CR2450
Dark to light delay	0,1 - 1,0 seg
Darkening lens	DIN 9 - 13
Filter dimension	110 X 90 X 9 mm
Mask material	Nylon/polyamide
Permanent UV/IR protection	Yes
Reaction time	1/30.000 seg
Reaction time adjustment	Yes
Sensitivity adjustment	Yes
Shade adjustment	Yes
Type of welding	SMAW, MIG, MAG, TIG, PAS and PAC
Autonomy	5.000 hours
Certification	EN 166, EN 175 B e EN 379
Operating mode	Grinding, weldig
Operating temperature	- 10º ~ 60º c
Power source	Lithium-ion battery + solar cell batery
Viewing area	96 x 39 mm
