

CHEMICAL SPLASH GOGGLE WITH DIRECT VENTILATION

VIO1120

These direct-vent safety goggles are designed to provide reliable eye protection in industrial environments, workshops, laboratories and maintenance applications. Fitted with clear polycarbonate lenses and a flexible PVC frame, they are certified to EN 166:2001, meeting the European requirements for personal eye protection. The Optical Class 1 lenses provide excellent optical quality for prolonged wear. The direct ventilation system promotes airflow to help reduce lens fogging while maintaining effective eye protection. The goggles also provide protection against high-speed low-energy particles, in accordance with EN 166. An adjustable elastic headband ensures a secure and comfortable fit, while the design allows the goggles to be worn comfortably over prescription glasses.

Key features

- > Certified to EN 166:2001
- > Optical Class 1 lenses
- > Clear polycarbonate lenses
- > Flexible PVC frame
- > Direct ventilation system
- > Protection against high-speed low-energy particles
- > Adjustable elastic headband
- > Can be worn over prescription glasses

Specifications

Adjustable elastic band	Yes
Allows the use of eyeglasses simultaneously	Yes
Direct ventilation system	Yes
Frame	PVC flexible
Optical class	1 (extended work)
Certification	EN: 166:2001
Height	150 mm
Length	210 mm
Product weight	0.064 kg
Weight with packaging	0.084 kg
Width	50 mm
Lenses	Clear polycarbonate
