

LIFT TIG WELDING TORCH FOR INVERTER (12.5MM) VITLTIG125

The Lift TIG Torch VITLTIG125 is designed for high-performance TIG welding where robustness and reliability are essential. With a 12.5 mm diameter, it is ideal for intensive and continuous welding tasks. Fully compatible with the VII250A, it works with 1.6 to 2.4 mm electrodes. The 3-metre cable offers excellent reach and mobility. Built from premium materials, it withstands heat and wear, ensuring long service life and consistent results.

Key features

- > Compatible with VII250A welding machines.
- > Strong 12.5 mm head for demanding applications.
- > Suitable for 1.6 / 2.0 / 2.4 mm electrodes.
- > 3 m cable for extended operational range.
- > Heat-resistant and highly durable.

Specifications

Compatible with	VII250A
Electrode length	1,6 ; 2 e 2,4mm
Handle	3m
